Kids Care about Climate Change 2021: Plant a Tree, Cool the Earth!

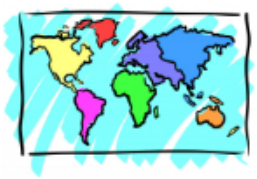

About the GIANT banner | About | View Entries | Prizes | Support Us | 2018 Contest | A ↔ 文

Would you like the *GIANT banner* to come to your school?

2629

trees will be planted

33

countries

Argentina, Australia, Belarus, Brazil, Brunei, Canada, Colombia, Denmark, France, Germany, Hungary, India, Indonesia, Kenya, Malaysia, Mexico, Mozambique, New Zealand, Norway, Pakistan, Saudi Arabia, Singapore, South Africa, Spain, Sri Lanka, Switzerland, Trinidad And Tobago, Uganda, United Kingdom, United States, Uruguay, Zambia, Zimbabwe

213

schools

Drawings came from every continent and 33 countries!

USA

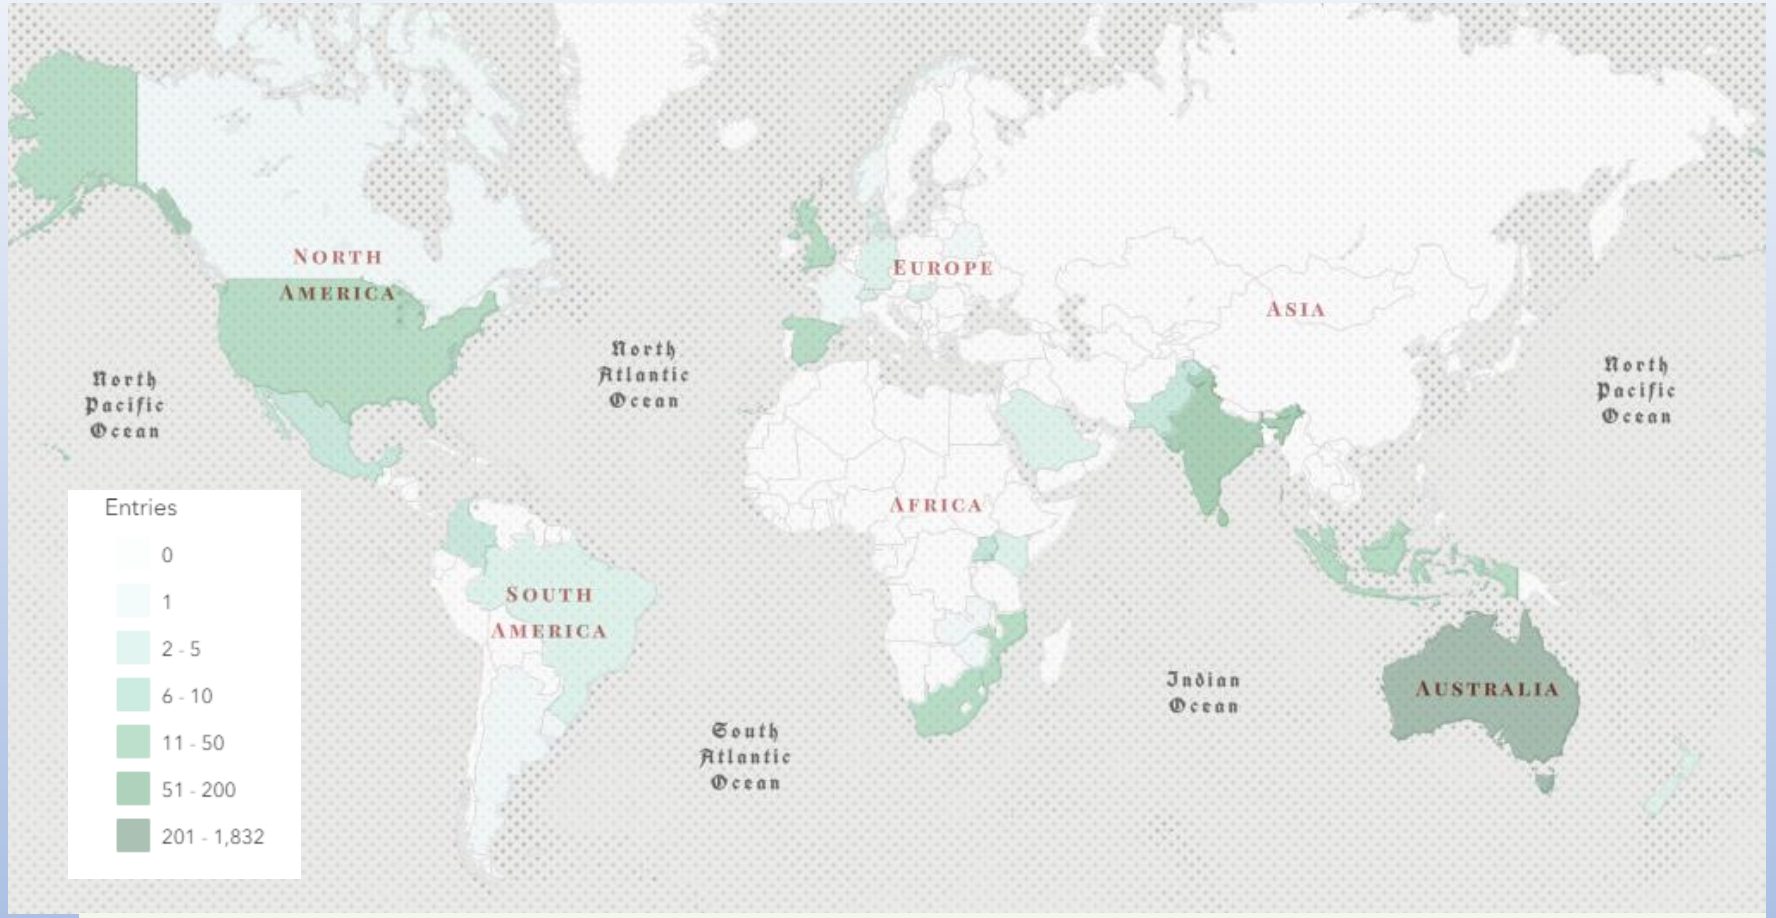

Mozambique

Mexico

The countries are: *Argentina, Australia, Belarus, Brazil, Brunei, Canada, Colombia, Denmark, France, Germany, Hungary, India, Indonesia, Kenya, Malaysia, Mexico, Mozambique, New Zealand, Norway, Pakistan, Saudi Arabia, Singapore, South Africa, Spain, Sri Lanka, Switzerland, Trinidad And Tobago, Uganda, United Kingdom, United States, Uruguay, Zambia, and Zimbabwe.*

Drawing sailed around Antarctica!

Once it is safe to visit Sri Lanka, I will bring the signed flag and the giant banner to the winner!

How did we make the giant banner of all the drawings?

1. 2,629 drawings mosaic'd to form a bigger picture. Design split into 5 sections.

2. 5 sections printed – twice!

3. Sections sewn together, reinforced around the edges, handles added –(10 hours each time)

4. DONE: 7 m high, 4 m wide!!

Where has the giant banner been so far?

Marji dressed as both the Earth and a giant penguin!

We celebrated how trees can help cool the earth by doing the tree pose (on a very HOT day).

Kids used their bodies to send an S-O-S to the world about climate change next to the giant banners.

Penguin Parade, Phillip Island, Victoria

MAIN: Alongside creating an SOS from the sky, students also posed with green and brown cloth in the form of a tree in a bid to raise awareness. C61_0823 **INSERT: Students and volunteers spelt out SOS as they demand greater change to combat climate change.** *Photo: Joel Sharpe*

Banner for climate change

Phillip Island Nature Parks hosted a special event for Climate Action at the Penguin Parade on February 17, attended by students from local primary schools.

A giant banner is currently touring the country, to raise awareness about climate change, as part of the Kids care about Climate Change campaign.

Dr Marji Puotinen brought a giant banner made from 2629 kids' drawings.

Local primary school children were invited to attend and help to hold up the huge beach banner, which was photographed and filmed from the sky. The giant banner has visited 19 schools and six nations so far.

A video of its travels was shown at CoP27 in Egypt in Nov 2022: *www.youtu.be/Gu9kZ5-crds*.

"Children are the future care takers of our planet and will experience the impacts of climate change in a more profound way than any generation that came before them," said Catherine Basterfield, CEO Phillip Island Nature Parks.

"The Nature Parks are excited to support this activity that gives children a voice to champion change in a meaningful and positive way."

For more information, visit *kidscareaboutclimate.org*

A giant banner touring the country, to raise awareness about climate change, as part of the Kids care about Climate Change campaign, visited the Penguin Parade last week.

Plant a tree, cool the Earth

SAN REMO Primary School and Our Lady Star of the Sea grade five and six students convened at the Penguin Parade recently in a show of solidarity with students around the world.

Hosted by Phillip Island Nature Parks, in conjunction with the Australian Institute of Marine Science's Dr Marji Puotinen, the event was a spectacular hit raising awareness and giving students the chance to be part of a larger movement.

"Earth's climate is changing," Research Scientist, Dr Marji Puotinen said.

"The first contest I ran in 2018 because I was going to Antarctica with an international leadership program, and I wanted to do something worthy.

"That's when I first decided to get kids to draw what they love most about coral reefs and penguins.

"I then made a giant banner of all the drawings – 1246 from 11 countries and we took it to Antarctica.

"This time, I wasn't going to Antarctica, but we wanted to plant a tree for every drawing we received and focus on solutions. Touring with the banner is a way to inspire people to continue to find the pathways to their own actions that they feel comfortable with.

"This banner has been to six countries and has been visited by 26 schools to date. We are going to keep politicians and diplomats on their toes."

Well informed about the local penguin colony, Dr Puotinen introduced students to the other penguins around the world and in particular those that are endangered particularly due to oil spills, melting sea caps and climate change.

"Most penguins live with ice and when that ice melts that poses a problem and affects how easily they can find their food and become easier prey."

In discussing the atmosphere and melting ice, Dr Puotinen explained the importance of krill and sea phytoplankton both at a local scale to creatures in Antarctica but also on a global scale and linked it back to Kids Care about Climate Action 2021's overarching question: what do penguins and coral reefs have in common?

The huge banners measuring 7 metres long by 4.25 metres wide are made up on 2629 drawings from 33 nations and 213 schools and debuted at the United Nations Climate meeting in Glasgow in November 2021, before touring the world.

On Friday, students headed down to the sand with the giant banners before recording their messages to form a longer video for key politicians and policymakers in a push for greater urgency around slowing climate change.

"Children are the future care takers of our planet and will experience the impacts of climate change in a more profound way than any generation that came before them," Catherine Basterfield, CEO Phillip Island Nature Parks said.

"The Nature Parks are excited to support this activity that gives children a voice to champion change in a meaningful and positive way."

A video showing the giant banner with messages from kids around the world was shown at the United Nations climate meeting (COP27).
